August 22, 2006

Dr. Woodward:

This communication is in follow up to the attendance of technician Tamara Hancock and myself at your Level I and Level II Dental Training Seminar, held at your practice July 14 and 15, 2006 in Colorado Springs.

I consume an average of 150 CE hours per year in professional, medical, surgical and management topics. I look for and appreciate good organization before and during the seminars. Your dental seminars were very well organized by you and your competent and friendly staff.

The dental topics were very relevant to the needs of technicians and doctors who wish to provide quality dental services at the progressive general practitioner level.

Your facilities and equipment were outstanding. The morning lectures and afternoon wet labs in dental radiography and procedures gave us skill sets to utilize when we returned home to our practices.

The hospitality shown to us was appreciated as was the food functions.

Most important to me, Dr. Woodward was your skills as a presenter and teacher. Thanks for showing us what's possible in dental medicine and surgery in our practices that are of benefit to our patients and clients.

Most Sincerely,

Marv Johnson, DVM
